Amber comes in several colours and most of designs can be produced in all colours. Designs containing more than one stone can be done in any combination of colours, which we call "multi". All the colour options are listed below together with the pages where You can find their most proper examples.

Cognac like on the 5 page of this catalogue
Cherry like on the 48 page of this catalogue
Green like on the 32 page of this catalogue
Multicolour in some designs You can find more than one stone, in such designs, to make them even more beautiful, we can mix different colours- like on the page 4 of this catalogue.

I am certain we will make a good business together
